OUR EDUCATIONAL APPROACH

Our educational approach strives for a holistic and transformative learning process that allows for the development of cognitive, transdisciplinary, social and emotional skills. Our activities place the student at the heart of a continuous learning process that is based on the love of nature and an understanding of sustainable development and that follows the learning matrix outlined below:

- **We understand...**
  - the interrelations and interdependencies between human beings and their natural environment.
  - the challenges of sustainable development and of the world around us.

- **We want to...**
  - protect the planet and its inhabitants.
  - contribute to building a sustainable world.

- **We can...**
  - think differently.
  - form our own opinion.
  - identify our spheres of influence and levels of action.
  - imagine and experiment with new solutions.

- **We take action...**
  - here and now.
  - to adopt new individual and collective attitudes.
